# Barrier.Gate

The barrier gate to meet every challenge.

No barriers for you and your applications – but a distinct boundary for your parking facility!

## Quick Movements, Longer Booms

- Boom lengths up to 4,5 meters (14,76 ft) in one single variation of the basic device with optional magnetic lock to prevent misuse.
- Configurable opening times: openings are up to 15% quicker than other systems.

## The Intelligent System Without Column

- The inexpensive solution for your long-term parking facility: You only need the barrier gate, no column.
- Integrable RFID readers solve the task of parking facility monitoring.
- Small amount of components.

## Entirely New Applications

- Display of various symbols via the integrated track light.
- Surveillance using a built-in video camera that is safe against vandalism.
- Unique: Colored joint barrier boom using RGB LEDs for safety and recognisability.

## High-Quality, Energy-Optimized Components

- High-quality design that is the best in its field.
- Special focus on the use of energy-saving components.
- Operation in a wide range of temperatures possible without any extra heating or ventilation.
